

## Clean air and containment equipment

### Medtronic, Galway, Ireland

Drug eluting arterial stent manufacture

#### Principle features of project:

- Total spend to date in excess of £3m over a sequence of projects including:
  - » Drug end item lines
  - » Polymer coating lines
  - » Finishing lines
- 150 units in total including:
  - » Unidirectional airflow cabinets
  - » Isolators
  - » Safety cabinets
  - » Fume cupboards
  - » Controlled atmosphere isolators
- All cabinets and isolators non-standard and developed further in conjunction with the users with each successive phase
- Innovative design for a fully automated nitrogen purge isolator incorporating a microscope and with sequenced transfer chambers
